

## OPTION 1 KVM

### SITUATION:

When the graphics operator and kit are in different parts of a gallery or separate OB Trucks

KVM hardware provides a link between operator and kit

## OPTION 2 PEER TO PEER

### SITUATION:

When the graphics operator and kit are a long distance apart eg Operator at home and kit in the studio

Software at both ends allows the Operator to control kit through the cloud

Live Graphics  
using  
Social Distancing

**HAPPY**  
GRAPHICS

### SITUATION:

When the operator and kit are together based anywhere in the world and the production uses NDI

Graphics video signals sent via NDI network protocol to a cloud or physical production suite

### SITUATION:

When the graphics processing sits in the cloud alongside a virtual production environment and the operator is based anywhere in the world

## OPTION 3 NDI

## OPTION 4 COMPLETELY VIRTUAL
